PHP • JAVASCRIPT • WEB APPLICATIONS • FULL STACK Developer

I am a passionate developer that enjoys creating high-performance web applications that improve customers/clients user experience.

PROFESSIONAL EXPERIENCE

FULL STACK DEVELOPER

Summer International - under Gushcloud International Philippines Inc.

[Apr 2021 – Present]

Responsibilities:

- Attend to weekly tech meetings to report weekly accomplishments to our CTO and colleagues
- Attend checkpoint and alignment meetings with colleagues to discuss timeline and sudden changes.
- Create proof of concepts
- Api Integrations for third party apis - public, private or partners
- Peer code review with fellow developer
- Approve PRs for UAT and Production
- UAT Testing
- Logs and document all task via Trello Boards Card
- Work directly with our CTO in releasing impactful changes on our website
- Help team decide on the priority adjustments for tasks
- Give estimates for completions
- Prepare different solutions choosing the most optimum action
- Maintain, upgrade and add additional features to our websites
- Create, maintain and upgrade our admin dashboard
- Create automatic emails for notifying admins, customers and sellers
- Implementing designs by our web designer into our website
- Create promo codes to use in Marketing
- Closely work with other teams - Brands, Marketing, Logistics to receive their feedback and implement improvements that they want to implement.
- Be able to accommodate sudden and urgent tasks - give estimates if possible within the deadline, if not - devise and give alternative solutions while working on the request.

Accomplishments:

- Learned Livewire and Alpine JS in less than a week to be able to Go live on the set deadline
- Go live for our e-commerce websites
- Product Curation Feature - Each seller can have specific products to sell on their websites
- Upgraded Settings Page
- Admin Dashboards from Development to Deployment - Products, Brands, Users (Customers and Sellers), Sales, Banners, Categories, Prices
- Upgrades on Products Management that made creation and publishing products easier

- Upgrades on Banner Management that made the creation and publishing of sales banner easier
- Upgrades on Categories Management - this enabled the easy separation of products for the domain separation of retail and wholesale
- Upgrade Landing Page for wholesale twice and retail once
- Wholesale and Retail Domain separation
 - Retail Store - Customers can buy products with retail prices
 - Wholesale Store - Customers are allowed to buy products with wholesale prices with certain conditions
- Maintain results and efficiency in working on the requirements.
- Integration of different external apis public or private ones, e.g. IPAPI, STRIPE, AMAZON MCF, Sendinblue (now Brevo), Xendit, Shopify
- Update UI on our 3rd Ecommerce website
- Inventory Management Integration in admin for Inventory tracking
- Product Listing Duplication - Replication of products created with basic and advance feature (customizable information to replicate)
- SEO maintenance

PHP DEVELOPER

Cafe24 Philippines

[July 2019 – Apr 2021]

Responsibilities:

- Collaborate with co-developers in developing a web application
- Present design specifications
- Daily work logs recording and weekly accomplishment reports
- Research and continuous learning of the techs required to be used
- Creation of our prototype to have a better understanding of the functions and specs of the app while our graphic designers are still working on the final design
- Work with graphic designers and taking their designs into a working application
- Create documentations
- Setting up local development server for each application as per the required specs
- Create and test the applications in local and development server environment
- Troubleshoot and debug raised bugs by QA testers
- Updates and maintain the applications

Accomplishments:

- Co-developed the Back-in-Stock Notification App that is successfully launched to our company's APP STORE last 2020
- Developed the first project that is deployed using the new tech introduced by the company
- Finished my first project 1 month ahead of schedule despite being the sole developer and being the first developer to implement the new workflow process within the company
- Have successfully finished my probationary project on tight schedule
- Passed the intensive training provided by the company to learn their development process and be merged with the system on how they do tasks and develop projects

FORMAL EDUCATION • PROFESSIONAL DEVELOPMENT

THREE MONTHS INTENSIVE TRAINING COURSE

TUITT Coding Bootcamp, Metro Manila PH

March 2019 – June 2019

BACHELOR OF SCIENCE IN ELECTRONICS AND COMMUNICATIONS ENGINEERING

University of Saint Louis-Tuguegarao

June 2011 – April 2016

ABOUT ME

As an engineer, I always love solving problems, especially mathematical problems because I am thrilled to find the solutions. I am always excited with the thought of bringing unconventional but more efficient coding solutions to logic problems. Outside of work, when I rest, I find myself reading novels or manga and sometimes I just want to play mobile games.

“Try not to become a man of success. Rather become a man of value” – Albert Einstein
